THe Roman Calender preuenteth ours tenne dayes, for our twentie-two of December, is in Italy, France, and Spaine, the first day of Ianuary. Euery moneth beginneth, and euery immoueable feast is tenne dayes sooner, then vvith vs: But Easter, and all moueable feasts happen to be sometime the same day, or else before (as this present yeere, Easter is fiue weekes sooner) but neuer later then with vs.

Generall Rules of Husbandry.

GRaffe and plant trees, the Moone being in taurus, virgo, and capricornus, the fit time of the yeere considered: In the increase of the Moone, the wind neither East, nor no part North.

Remoue, and set young trees in the first quarter, the weather not colde, nor wet, from September vntill Februery.

Set, or sow all kinde of seeds the Moone in aries, taurus, cancer, virgo, libra, capricornus, aquarius, or pisces: but the seedes whose rootes be round must be sowen 3. or 4. dayes before or after the full.

Gather hearbes and fruite to keepe after the full of the moone, and in the last quarter, in faire and drie weather and afternoone.

Cut hedges, betweene the change and the full, from the end of January, till the beginning of June.

Sheare sheepe, cut haires, and sowe all manner of corne in the increase of the Moone.

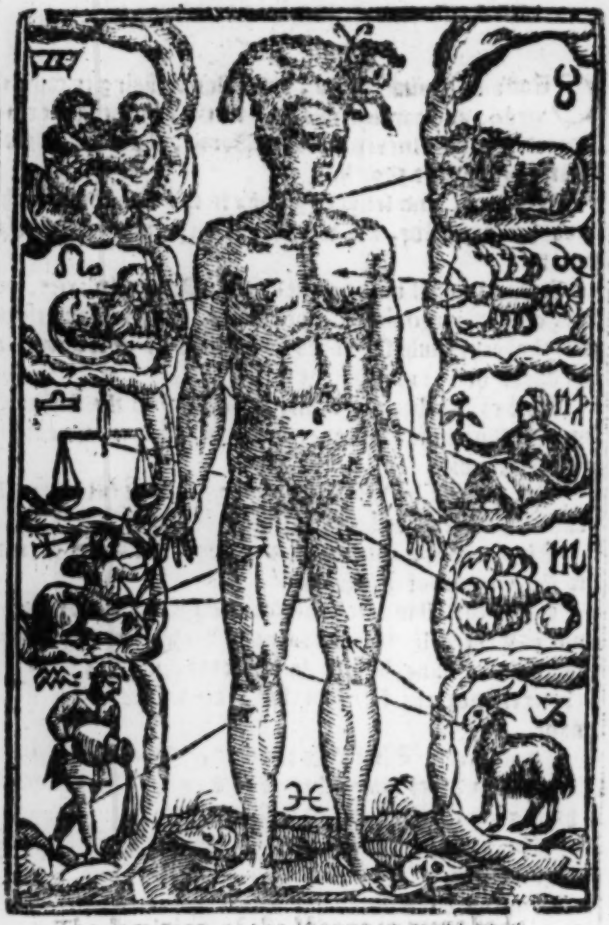
Gelde cattell in aries, libra and sagit. the Moone being not past the full, it matters not when you let them bloud, so that the signe be not in the heart, nor the day of the change, nor the signe in that place where the incision is made.

Fell great Timber in the olde of the moone, in December, and January is best: But Coppice that you would haue growe againe, in the first quarter.

From September to March, it is good to set all kinde of quick-sets.

Dung land that weeds may not abound, in the old of the Moone.

To know the day of the Month after the Roman accompt, adde 10. dayes to the number of the dayes of our yeere, and you haue your desire.



The dominion of the Moone in mans body.

Aries head, Taurus neck, Gemini armes require,
Cancer breast, Leo heart, Virgo guttes desire:
Libra loynes, Scorpio secrets, Sagitarius thighes,
Capricorn: knees Aquarius legs, & Pisces feete supplies.

There be in euery yeare, theſe foure termes appointed for the hearing and determining of all Contractes, Diſcordes, and other matters in the Common-wealth, the reſt is Vacation for men to follow other buſineſſe.

Theſe Termes with their Returnes, which be 4. 5. or 8. in euery Terme, haue their names of ſome principall Feaſt, or Saints day, ſet downe in the Kalender, as Eaſter Terme, of the feaſt of Eaſter, which it followeth. Hilarie, of S. Hilarie his day the 13. of Ianuarie &c.

There be 6. kinde of Returnes, Craſtino, Octabis, Quindena, Tres, Menſe, & Quinque, but euery terme hath not all of them.

Craſtino is the day following, as Craſt. Aſcenſionis, is the morrow after the Aſcenſion day.

Octabis is the 8. day after, reckoning both as Octabis Trinitatis, is the eight day after Trinity Sunday.

Quindena, is the xv. day after.
Tres, is that day iii. Weekes.
Menſe, is that day Moneth.
Quinque, is that day v. Weeks.

Note that the first day after euery of the feasts, set downe for euery Terme, the Court of the Arches is kept in the forenoone in Bow Church, and the Admirall Court the same day in the afternoone in Southwarke.

The second day after euery of the said feasts, the Audience Court is holden in the Consistorie in Pauls in the forenoone, & the Prerogatiue Court in the same place in the afternoone.

The third day following euery of these feasts, the Bishoppe of Londons Consistorie Court is holden in Paules, in the forenoone, & his Maiesties Court of Delegates, in the same place in the afternoone.

The fourth day after the foresaid feasts, his Maiesties Court of High Commission is kept in the Consistory in Paules, or (as it hath bin now of late euery weeke in the Terme time on Thursday in the afternoone) at Lambeth, but if any of the dayes before recited be Sunday, or any Holiday, then is such Court kept the day following. Note also, that in Hilary Terme, foure of the aboue named Court daies be ordinarily kept, and as many in Easter, and Trinity Termes, according to the course of the yeare, at the Iudge of Arches his discretion, who at the end of euery Terme, appointeth the Court dayes to be kept in the Terme next following:

following: but in Michaelmaſſe Terme, the Court dates for the ſame before ſet downe are certainly kept. I therefore admoniſhall Country men cited by any originall proceſſe to appeare in the Arches, Audience, Prerogatiue, or Delegates, to ſend to ſome Proctor, a note of the cauſe, and to what Court they are cited, to appeare for them, and to returne them word of the very day it ſhall be needfull for them to appeare in perſon. But the courſe of practiſe in the high Commiſſion, and the Admirall Court is otherwiſe, for euery proceſſe thence requires perſonall appearance.

¶ *Of the Eclipſes which ſhall happen this preſent yeere of our Lord God* 1614.

THis yeare of our Saluation 1614. there will be foure Eclipſes, two of the Sun, and two of the Moone. The firſt of the Sunne being the 29. of March will not appeare in our Horizon. The firſt Eclipſe of the Moone, ſhall

visibly appeare the 14. of Aprill, shée shall bee darkened 7. points, and 3. minutes (more then halfe her body) the space of darknes, from the beginning to the end, shall be 2. houres 47. minutes, shee shall begin to be Eclipsed, before 4. in the morning.

The second Eclipse of the Sunne, appeareth the 23. of September, at one of the clocke in the afternoone, the digits Eclipsed are 5. degrees, 30. minutes, the whole durance is two howers, 20. minutes.

The second Eclipse of the Moone, happeneth the 7. of October, 25. minutes after 4. at night: shée shall lose of her light 4. digits, and 19. minutes: the whole time of this Eclipse will be 2. howers, 26. minutes.

Obſeruations of Husbandry for euery Moneth in the yeere.

IN Ianuarie trench Gardens with dung, plant all kinde of quicksets, set roses, chesnuts, filberds, peaches, and plums: set, or sowe kernels, and stones of fruites, bay trees, or berries, privie, box, &c. And (if the frost be not too hard) remoue trees, sowe rounsifall peaſe and beanes, rid fruit trees of superfluous branches, loppe trees and hedges, drench and geld cattell for reare, fallow land for wheate and rie. And almaines note that the best time to set, sowe, remoue,

loppe

loppe and prune, is before the full, but sow pease and beanes, dung land, and fell great timber in the last quarter. In this Moneth and the next vse no phy-sicke, vnlesse necessitie force thee: vse warme cloathes and eate warme meats and drinks.

In Februarie set, cut, and lay quicksets, graft, remoue trees, set plants, vines, osiers, and roses, sowe pease, and beanes, kernels, and mustard seed, plash hedges, cast vp ditches, and set hoppes: Now to gardening and prouide for sallets in Summer, and sow Oates in cold and stiffe land.

In March in the new of the Moone (the winde and weather regarded) graft, plant, and sow, that you left the last moneth, couer the rootes of trees with rancke earth, which you before bared. Sow pease, beanes, oates, parsenips, onions, cowcumbers, melons, and all kinde of seedes for potherbes, gilde lambes, slip artichokes, and sage, plow barley land, and in cold clay land sowit, in the end of this Moneth take physicke, for whatsoeuer disease cannot now be holpen, will not be rid all the yeare after.

In April sow barley, hempe, and flax, and all kinde of seedes, which are left vnsowen, pole vp your hops, set garden herbes; let the Tanner prouide him now of barke: good huswiues get about your dairies, and for them that haue aches, or be troubled with the gout, to goe to the Bathes this moneth (with the two next) is the most temperate time.

In May sow barley, (especially in the Northerne parts) graft and couer the rootes of your trees (which you before bared) with rancke earth, set kils to worke. Set and sow all fine herbes, and seedes: sow flax and hempe, weede your corne, put lambe from Ewe. Steirre land for Wheate and Rie: leaue lopping of trees, teach hop to clime, but cut off the superfluous

branches,

branches. Riſe betime and walke in the fragrant fields, and by running ſtreames: eate, and drinke betimes ſage-ale, and to drinke ſweete wine faſting is now verie holſome.

In Iune weede corne, and gardens, after the firſt raine, ſheare ſheepe, get home fewell, ſet roſemary, carnations, and gilliflowers, ſow lettice and reddiſh, for now they will not runne to ſeede, make hay, and cut neither hedge, nor tree during Iune, Iuly, and Auguſt. Beware of great thirſt, and vſe a light, and thin diet.

In Iuly apple making of hay, fallow land for wheate, pull hempe that is ripe, gather garden beanes, get Rue, and wormewood to ſtrew on floores, to drive away fleas, and mothes; gather flowers, and ſeedes at the full of the Moone: drie your flowers in the ſhade till they be almoſt drie, and then ſunne them a little for feare of corrupting, take heede of ſudden colds, and bleed not without vrgent cauſe.

In Auguſt reape wheate, and rie. Sow winter herbes in the new of the Moone. Gather garden ſeedes for the next yeere, Cut downe Oates, Refraine from ſleepe after meate, vſe moderate diet; and beware of ſickneſſe.

In September gather hoppes, and fruit, make verjuice kill bees. Sow wheat and Rie in ſtronge and cold clay land. Sow Parſnips and Carrets, Remoue and ſet ſlippes of all kindes of flowers, between the two Ladydayes, and remoue trees that be yong every new Moone till Candelmaſſe, ſet roſes, ſtrawberries, and barberies, and who ſo hath needs may now take phyſicke.

In October ſow wheate and Rie, the ſooner the better, for feare of raine, Sowe Acornes, and Nuts, Gather winter fruit after Noone, the weather drie,

and

and after the full of the Moone. Cut rose trees to haue plenty of roses, and but once in two yeeres; vse hot meats, and drinkes, prouide warme clothing and goe vpte shod.

In November make mault, kill hogs, sow hasting pease: trench gardens with dung, set Cabbrege-stockes, make Martilmas beefe. In hot ground you may sow wheate and Rie: vse holsome meats and drinkes, and good exercise to preserue healeh, and no physicke.

In December, and Ianuary, cut downe great timber in the old of the Moone, but couer the rootes of fruite trees, fallow land for Barley. Set Beanes & Pease, couer herbes from cold, looke well to cattell, take fowles with nets, and lime twigges, set stockes, cherries and plums, let horses bloon, and at Christmas let Liberality be Master of the house, and hospitality thy exercise, the poore thy guests, so shalt thou be loued of Iesus Christ, the great feaster, to whom be praise for euer and euer. Amen.

¶ To iudge of weather to come by the ſigne wherein the Moone is at the change, quarters, and full.

VVHen the Moone ſhall change, enter into the firſt or laſt quarter, or come to the full in Aries, Leo, or Sagitarius, in the winter commonly there followeth faire weather, but in Summer immoderate heate, eſpecially if it be in Iune or Iulie.

If the change, full, or quarters chance in Taurus, Virgo, or Capricornus, in winter iudge of cold froſt, or ſnow. In Summer it is a ſigne of temperate weather.

When the ſaid times happen in Gemini, Libra, or Aquarius, it prognoſticateth much winde, eſpecially in Autumne or the Spring.

And when the ſayd times fall in Cancer, Scorpio, or Piſces, in winter looke for moiſt and rainy weather to follow, but in Summer it foreſheweth pleaſant temperate weather to come afterward.

Natu-

¶ Naturall coniectures of the weather.

Signes and tokens of faire weather.

WHen the Sunne riseth clere and not red, and is red at the setting. When the Moone at the prime (which is when she is 3. dayes and 18. houres old) is faire & bright. When there is a Rainebowe presently after raine. When mists come downe from the hils, and settle in the valleys. Mists in the Euening rising from the water. Crowes and Rauens gaping against the Sunne. If it lighten in the Horizon without Thunder. The Skie being red in the Euening. If flies or gnats bee seene to houer together, about the beames of the Sunne before it set, and flie together making as it were the forme of a Pillar. The skie being red in the euening.

Signes

Signes of raine and fowle weather.

IF the Sun be fiery red at his riſing, when a little after that he is vp, he be couered with great blacke cloudes. If at his ſetting he be ouercaſt with a thicke miſt, or goe downe behind a great blacke cloude. If the hornes of the new Moone be blunt. If a blackiſhneſſe appeare in the middle of her. If two Raine-bowes bee ſeene together. When Bels are heard further then vſuall. When wainſcot dores, and wooden couerings open ſtraiter then of cuſtome. If Swine, and Peacocks make a great noiſe, when birdes bee buſie in waſhing and pruning themſelues, crying, and making great noiſe about the water. The continuall, and timely crying of the Crow. Hens going to their Pearch couered with duſt, Moles heauing buſily. Cattell eating greedily, and licking their houes, breathing into the aire with open noſtrels. When Bees flie not farre from their hiues. If the flame of the fire doe waue vp and downe, or that ſparkles flie from it. When the Cockes doe crow by night more timely then they were wont. If the Sea doe ſwell, and flow higher then ordinary. If the cloudes appeare whitiſh

in

in Summer time. The chirping of sparrowes in the morning. The blustering noise of leaues and trées in woods. If it thunder when the winde blowes. If in the beginning of winter small birdes doe flocke together in the fields. If the winde blow hard in the South, and presently change to the North, it is a token of a very great tempest vpon the Sea very shortly after.
